**NEGATIVE DECLARATION
NOTICE OF DETERMINATION OF SIGNIFICANCE
State Environmental Quality Review (SEQR)**

This notice is issued pursuant to Part 617 of the implementing regulations pertaining to Article 8 of the Environmental Conservation Law (SEQR).

The Village of Millbrook, as lead agency, has determined that the proposed Action described herein will not have a significant effect on the environment and that an Environmental Impact Statement will not be prepared.

DATE: May 22, 2018

NAME OF ACTION: Village of Millbrook Water System Improvements

LOCATION: Village of Millbrook/Town of Washington Dutchess County, NY

SEQR STATUS: Type I

LEAD AGENCY: Village of Millbrook
PO Box 349
35 Merritt Avenue
Millbrook, NY 12545

DESCRIPTION OF ACTION:

The Village of Millbrook located in Dutchess County, New York owns and maintains a water supply and distribution system that delivers potable water to approximately 1,400 customers through 720 service connections within the Village of Millbrook and the Town of Washington.

As a result of water sampling and site inspections, it has determined that the water infiltration galleries are under the influence of surface water and, in addition, are at risk of contamination from flooding of the adjacent streams. In order to provide the treatment required, the Village is proposing to construct a new filter system. The proposed filter building will be located at the site of the existing water supply and treatment facility. The building will be constructed at an elevation necessary to prevent flooding from the adjacent streams during extreme wet weather. In addition to the construction of the filtration building, the existing 500,000 gallon storage tank, located in the Village, will be drained, cleaned and painted.

Reasons Supporting This Determination:

The Village Board has reviewed the FEA and the criteria contained in 6 NYCRR §617.7 and has determined that the Project will not have a significant impact on the environment for the following reasons:

As required by §617.7(b), the Village has:

- Considered the Action as defined in subdivision 617.4
- Reviewed the FEAF, the criteria identified in Subdivision (c) of this section and other documentation to identify relevant areas of environmental concern.
- Analyzed the identified relevant areas of environmental concern to determine whether the action will have a significant adverse impact.
- Set forth herein its written Finding of No Significant Environmental Impact

The following indicators of significant adverse impacts on the environment, as listed in 617.7(c)(1), were considered:

1. Will the Proposed Action result in a physical change to the Project site?
Small to moderate impact. Construction at the water treatment site will disturb less than 1 acre of land and work will be completed mostly in an areas which have previously been disturbed.
2. Will there be an effect to any unique or unusual land forms found on the site?
No impact. No such land forms exist in the Project area.
3. Impacts on Surface Waters:
 - a. Will Proposed Action affect any water body designated as protected? (Under Articles 15, 24, 25 of the Environmental Conservation Law, ECL)?
Small to moderate impact. Construction will take place within the vicinity of the Mill Brook and Shaw Brook and NYSDEC and NWI wetlands. No waterbodies will be disturbed by the proposed Project.

In accordance with applicable regulations, a Stormwater Pollution Prevention Plan (SWPPP) may be prepared and implemented for the construction so as to mitigate potential impacts to surface water quality. Work will be completed under terms of ACOE and NYSDEC permits (if required) to mitigate the potential environmental impacts.
 - b. Will Proposed Action affect any non-protected existing or new body of water?
No impact has been identified.
4. Will Proposed Action affect surface or groundwater quality or quantity?
Small to moderate impact.
5. Will Proposed Action alter drainage flow or patterns, or surface water runoff?
No impact has been identified.

6. Will Proposed Action affect air quality?
No impact has been identified.
7. Impacts on Plants and Animals:
 - a. Will Proposed Action affect any threatened or endangered species?
No impact. No rare or state-listed animals or plants, significant communities or other significant habitats are known to occur within the project sites.
 - b. Will Proposed Action substantially affect non-threatened or non-endangered species?
No impact has been identified.
8. Will Proposed Action affect agricultural land resources?
Small to moderate impact. The project is located within a designated agricultural district. All work will be conducted per NYS Agriculture and Markets permits (if required).
9. Will Proposed Action affect aesthetic resources?
No impact has been identified.
10. Will Proposed Action impact any site or structure of historic, prehistoric or paleontological importance?
No Impact. NYS OPRHP has issued a Letter of No Effect for the Project.
11. Will proposed Action affect the quantity or quality of existing or future open spaces or recreational opportunities?
No impact has been identified.
12. Will Proposed Action impact the exceptional or unique characteristics of a critical environmental area (CEA) established pursuant to subdivision 6NYCRR 617.14(g)?
No impact has been identified. No such areas have been designated in the Project area.
13. Will there be an effect to existing transportation systems?
No impact has been identified.
14. Will Proposed Action affect the community's sources of fuel or energy supply?
No impact has been identified.
15. Will there be objectionable odors, noise, or vibration as a result of the Proposed Action?
Small to moderate impact. Heavy equipment will be used during construction which may periodically cause noise and vibration above those usually experienced in the area.
16. Will Proposed Action affect public health and safety?

No impact has been identified.

17. Will Proposed Action affect the character of the existing community?

No impact has been identified.

18. Is there, or is there likely to be, public controversy related to potential adverse environment impacts?

No impact has been identified.

617.7(c)(2) – For the purpose of determining significant adverse impacts on the environment of those factors listed above, the long-term, short-term, direct, indirect and cumulative impacts, including simultaneous or subsequent actions, to the extent reasonable, as included in any long-range plan for the action, any action that is a result of the reviewed action or is dependent on the action were reviewed.

617.7(c)(3) – The significance of any likely consequences were assessed in connection with the setting of the action, the likelihood of occurrence, duration, irreversibility, geographic scope, magnitude and the number of people affected as a consequence of the action.

Based on this review, no adverse environmental impacts would result from this Action.

Full Environmental Assessment Form
Part 2 - Identification of Potential Project Impacts

Agency Use Only [If applicable]

Project:
Date:

Part 2 is to be completed by the lead agency. Part 2 is designed to help the lead agency inventory all potential resources that could be affected by a proposed project or action. We recognize that the lead agency's reviewer(s) will not necessarily be environmental professionals. So, the questions are designed to walk a reviewer through the assessment process by providing a series of questions that can be answered using the information found in Part 1. To further assist the lead agency in completing Part 2, the form identifies the most relevant questions in Part 1 that will provide the information needed to answer the Part 2 question. When Part 2 is completed, the lead agency will have identified the relevant environmental areas that may be impacted by the proposed activity.

If the lead agency is a state agency and the action is in any Coastal Area, complete the Coastal Assessment Form before proceeding with this assessment.

Tips for completing Part 2:

- Review all of the information provided in Part 1.
- Review any application, maps, supporting materials and the Full EAF Workbook.
- Answer each of the 18 questions in Part 2.
- If you answer "Yes" to a numbered question, please complete all the questions that follow in that section.
- If you answer "No" to a numbered question, move on to the next numbered question.
- Check appropriate column to indicate the anticipated size of the impact.
- Proposed projects that would exceed a numeric threshold contained in a question should result in the reviewing agency checking the box "Moderate to large impact may occur."
- The reviewer is not expected to be an expert in environmental analysis.
- If you are not sure or undecided about the size of an impact, it may help to review the sub-questions for the general question and consult the workbook.
- When answering a question consider all components of the proposed activity, that is, the "whole action".
- Consider the possibility for long-term and cumulative impacts as well as direct impacts.
- Answer the question in a reasonable manner considering the scale and context of the project.

Full Environmental Assessment Form
Part 3 - Evaluation of the Magnitude and Importance of Project Impacts
and
Determination of Significance

Part 3 provides the reasons in support of the determination of significance. The lead agency must complete Part 3 for every question in Part 2 where the impact has been identified as potentially moderate to large or where there is a need to explain why a particular element of the proposed action will not, or may, result in a significant adverse environmental impact.

Based on the analysis in Part 3, the lead agency must decide whether to require an environmental impact statement to further assess the proposed action or whether available information is sufficient for the lead agency to conclude that the proposed action will not have a significant adverse environmental impact. By completing the certification on the next page, the lead agency can complete its determination of significance.

Reasons Supporting This Determination:

To complete this section:

- Identify the impact based on the Part 2 responses and describe its magnitude. Magnitude considers factors such as severity, size or extent of an impact.
- Assess the importance of the impact. Importance relates to the geographic scope, duration, probability of the impact occurring, number of people affected by the impact and any additional environmental consequences if the impact were to occur.
- The assessment should take into consideration any design element or project changes.
- Repeat this process for each Part 2 question where the impact has been identified as potentially moderate to large or where there is a need to explain why a particular element of the proposed action will not, or may, result in a significant adverse environmental impact.
- Provide the reason(s) why the impact may, or will not, result in a significant adverse environmental impact
- For Conditional Negative Declarations identify the specific condition(s) imposed that will modify the proposed action so that no significant adverse environmental impacts will result.
- Attach additional sheets, as needed.

No impacts have been identified that will have a moderate to large impact on the environment. See NEGATIVE DECLARATION, NOTICE OF DETERMINATION OF SIGNIFICANCE, adopted May ____, 2018 by the Village of Millbrook Village Board.

Determination of Significance - Type 1 and Unlisted Actions

SEQR Status: Type 1 Unlisted

Identify portions of EAF completed for this Project: Part 1 Part 2 Part 3

Upon review of the information recorded on this EAF, as noted, plus this additional support information

and considering both the magnitude and importance of each identified potential impact, it is the conclusion of the
Village of Millbrook as lead agency that:

A. This project will result in no significant adverse impacts on the environment, and, therefore, an environmental impact statement need not be prepared. Accordingly, this negative declaration is issued.

B. Although this project could have a significant adverse impact on the environment, that impact will be avoided or substantially mitigated because of the following conditions which will be required by the lead agency:

There will, therefore, be no significant adverse impacts from the project as conditioned, and, therefore, this conditioned negative declaration is issued. A conditioned negative declaration may be used only for UNLISTED actions (see 6 NYCRR 617.d).

C. This Project may result in one or more significant adverse impacts on the environment, and an environmental impact statement must be prepared to further assess the impact(s) and possible mitigation and to explore alternatives to avoid or reduce those impacts. Accordingly, this positive declaration is issued.
