

SITE PLAN / SPECIAL PERMIT USE TECHNICAL REVIEW CHECKLIST

The following are the Village of Millbrook Planning Board's guidelines used for its initial site plan and special use permit application screening review process. A conceptual review with the Planning Board may have taken place before this preliminary site plan and/or special use application is made. These guideline are included in site plan and/or special use application reviews as a checklist of items that have been developed for two primary reasons: 1) to inform the Applicant of the minimum information that the Board deems necessary to initially evaluate the site plan and/or special use proposal application, and 2) to allow for an efficient initial review of pertinent site conditions, technical requirements, development methods being proposed and other factors that will affect the overall site plan's design and the special use's potential impact on the neighboring properties. This checklist includes the minimum information required to be submitted before the Planning Board will consider the site plan and/or special use application ready for the Board's consideration. However, this checklist should not be construed to imply that no additional information will be required to qualify for the Board's review consideration, since unique features of certain properties and certain land uses require more detailed investigation and disclosure than others. For full site plan and associated report information submittal requirements, the applicant must refer to applicable regulations, specifications, and standards as detailed in the Village Zoning Code (Chapter 230), including the specific standards and provisions contained in Articles VI §230-43 and §230-44 of the zoning code.

Applicants or their professional consultants must fill out this checklist, certifying that all of the following items have been addressed in the site plan and/or special permit use application information being submitted, and attach a written explanation which provides the specific reason why a checklist item might not be applicable due to site specific or use specific circumstances. Until all checklist items are included as apart of the plan submission, with any required written specific explanation for all checklist items that have not been included, the application will not be eligible for the Board's review consideration. This checklist (and written explanation of omitted items, if necessary) must be submitted with the SITE PLAN / SPECIAL PERMIT USE APPLICATION INFORMATION FORM before it can be tentatively scheduled for review by the Planning Board.

Additionally, the Applicant must submit a written **PROJECT DESCRIPTION NARRATIVE**, which concisely describes the proposed project addressing: 1) its location, 2) a general description of existing adjacent and neighborhood uses, 3) the type and purpose of the proposed development, 4) the property's existing condition and use, 5) the zoning district in which it is located, 6) the scope of the proposed development (i.e., project acreage, number, size and use of buildings, parking facilities and expected traffic generation, hours of operation, total area of land disturbance), 7) any potential impact on the immediate area (i.e., aesthetics, drainage, natural resources, compatibility with neighboring uses, etc.), and 8) potential impacts on community services (i.e., school, traffic network, utilities, emergency services, etc.). The required narrative must be submitted with the SITE PLAN / SPECIAL USE PERMIT APPLICATION INFORMATION FORM. This required narrative should be limited to no more than one typewritten page.
